Hexaware Technologies and SOASTA Partner to Deliver Cloud Testing Services

- Hexaware Deploys SOASTA CloudTest™ On-Demand Service to Provide Affordable, Accurate Web-Scale Load Testing to its Customers
-

Mumbai, India and Jamesburg, NJ., — July 9, 2009 — Hexaware Technologies, a leading provider of IT & BPO services and consulting, today announced a strategic partnership with SOASTA, Inc., the leader in cloud testing. The partnership is a key component in Hexaware's strategy to expand its premiere testing services with a new cloud-based solution. Hexaware will integrate SOASTA's CloudTest On-Demand service into their existing offering to provide its customers with a turnkey cloud testing service to achieve and maintain highly reliable web sites and applications.

Cloud testing offers vast savings in testing infrastructure, provides complete flexibility and the most accurate representation of real world web traffic, without the worry of significant upfront hardware, software and human resource costs. Hexaware Technologies' customers can purchase the SOASTA CloudTest service on a pay-per-use basis directly from Hexaware.

Cloud testing is of particular benefit to Hexaware's clients in the travel, transportation, hospitality and leisure industries who experience high and unpredictable amounts of global traffic. SOASTA CloudTest offers a broad range of rich analytics, allowing Hexaware to tune clients' systems for optimal performance and throughput while fostering a positive customer experience.

"Our CloudTest service delivers flexibility, unlimited scale and the most comprehensive, real-time analytics available today," said Tom Lounibos, CEO, SOASTA. "Hexaware Technologies' experts now have the ability to quickly and regularly deliver testing services that overcome former limits imposed by hardware and software constraints."

"Hexaware delivers leading edge and innovating services to global clients leveraging leading technologies and skilled professional services teams," said R.V. Ramanan, President of Global Delivery, Hexaware Technologies. "SOASTA's leadership position in cloud testing enables us to expand and enhance our testing services with their proven platform, delivering a scope and scale for performance and reliability services not possible prior to cloud computing."

SOASTA CloudTest creates the confidence that web applications will work accurately under routine conditions, as well as respond to unexpected spikes in traffic, all of which result in huge performance improvements for Hexaware's customers.

About SOASTA

SOASTA's mission is to ensure that today's Web applications and services perform in a highly reliable, scalable, and predictable manner. The company's product, SOASTA CloudTest™, is available as an on-demand service that leverages Cloud networks or as an appliance (virtual and hardware), and enables developers to test and monitor their Web applications and services at an affordable price. SOASTA CloudTest supports Load and Performance testing. SOASTA is privately held and headquartered

in Mountain View, California. For more information about SOASTA, please visit www.soasta.com.
